

# Learn how to apply Certification, Qualification and Standards (CQS) in Additive Manufacturing (AM)

Irish Manufacturing Research (IMR) in conjunction with MTC UK is running a free pilot course with international recognition.

## Course Description:

As Additive Manufacturing (AM) moves from the production of prototypes to the manufacture of end-use parts, Certification, Qualification, and Standards (CQS) become vitally important. This training course will extend attendee understanding to enable the safe and effective adoption of AM for end-use parts and the impact on the way the business operates.

## Topics Covered:

- Certification in AM
- Qualification in AM
- Standardisation in AM
- Approach & Impact of CQS in AM
- Outline CQS Activities
- Applicability of CQS in AM process chain
- CQS Implementation Risks in AM

## Course Schedule

Week	Topic	Reading	Time Hours	Date
Week 01	Certification and Qualification	01	2	30.06.21
Week 02	Standardisation	02	2	07.07.21
Week 03	Applicability of CQS & Exam	03	3	14.07.21

## Exam Schedule

Date	Method of Assessment	Duration
Week 03	Multiple Choice Questions	10 minutes
